

JUPITER GOLD EXPANDS DRILLING FOR GOLD FROM 6 TO 25 HOLES IN ITS PARACATU PROJECT

BELO HORIZONTE, BRAZIL --(May 23, 2018) - [Jupiter Gold Corporation](#) (“Jupiter Gold”) announced today that it had expanded the drilling campaign of its Paracatu Project from 6 holes in an exploratory campaign to 25 holes in a detailed campaign. Eleven of the twelve holes already drilled have shown visual evidence of gold.

The target is an alluvial plain along the Rico Creek, which drains the giant Paracatu gold deposit known as “Morro do Ouro” (Gold Hill), an ore body of 16 million ounces owned by Kinross Gold Corporation (NYSE: KGC). Geochemical analysis of the higher quantity of samples collected in the detailed drilling will allow for stronger statistical significance of results. In turn, this will permit more accurate quantification for reporting and for the preparation of a permit to mine the area.

The senior geologist on the Paracatu Project is Rodrigo Mello, who has extensive experience in Brazilian gold geology. Mr. Mello has worked in Brazil for some of the largest gold companies in the world such as Goldcorp, AngloGold, and AngloAmerican, and has written 19 geological reports, mostly on gold formations.
